

MALDEN RIVER WORKS

FOR WATERFRONT EQUITY + RESILIENCE

Malden River Works is a community-led project for a new climate-resilient waterfront park for all.

WHAT: Starting with a short tour of the Malden River shoreline, **learn** about the top five invasive plant species and how you can help protect and enhance the Malden River ecosystem. Then, spend some time removing **invasive plants**. Finally, spread milkweed seeds to **create habitat** for monarch butterflies, an endangered and important pollinator species!

JOIN US FOR A RIVER STEWARDSHIP WORKSHOP!

WHEN: Saturday, October 15 from 10am – 12pm with pizza served at noon (rain date: Oct. 22)

WHERE: 356 Commercial Street, the Department of Public Works yard by the boat house

WEAR: Close-toed shoes, hat and sunscreen, and recommend long sleeves and pants to protect against bug bites. Clippers and gloves will be provided, but you're welcome to bring your own.

This project is made possible by the Leventhal City Prize from the Norman B. Leventhal Center for Advanced Urbanism at MIT, Municipal Vulnerability Preparedness Action Grants, the Malden Community Preservation Act, and an MAPC Accelerating Climate Resilience Grant.
